# Butler Breeder's Invitational

## Registered Texas Longhorn Cattle

September 2, 2023

Dear Texas Longhorn Breeders,

Welcome to the 2023 Butler Breeder's Invitational. This will be our 26th annual sale. Each year, the Butler Breeder's Invitational is committed to offering not only the finest in straight Butler cattle, but the finest in Texas Longhorns as well. This commitment is shared by our consignors and we are proud to be associated with them. We encourage you to contact them if you desire additional information on any of the sale lots. As Butler Texas Longhorn breeders, our commitment is two-fold. To the cattle, our commitment is to preserve and promote them to the best of our ability. To the people, it is to treat everyone with respect and welcome you as a guest in our own home.

This year will again feature a large selection of heifers. These are extremely high quality with unlimited potential. There are also proven producers that can make a positive impact on any program. Whether your interest is in the history of the bloodline and the continuation of the last viable pure family of Texas Longhorns that still survives or adding Butler genetics to blend programs as the essential key ingredient for superior results, top breeders have long recognized that the best Texas Longhorns in the industry all have one thing in common: Butler Genetics.

We invite you to use Internet bidding if you are unable to attend the sale in person. The sale will be webcast by [www.hiredhandlive.com](http://www.hiredhandlive.com). There will be bidding on the webcast. If you are interested in using this service, please visit the Hired Hand website for more information.

We invite you to return with us to Lockhart for the great cattle and fun times the Butler Breeder's Invitational has come to represent. As always, for everyone associated with the Butler Breeder's Invitational, we thank you for your interest and your participation!

Kaso Kety

Michael McLeod

Breeding Information: Bull calf at side born 2/26/23 by SH Buffalo Kelly 8/9. Exposed to SH Buffalo Kelly 8/9 from 2/26/23 to 8/15/23.

COMMENTS: Nicely bred with Farlap Chex and BL Rockett, Coach, George W. RG 92 and other greats from the past. Her bull calf although not a straight Butler, is by SH Buffalo Kelly 8/9, who is LLL Lucky bred on top and out of a really nice ZD Kelly daughter who measures mid 80's. She is exposed back to him. He is the type of black and white that is known as parker brown now and I think is a beautiful bull and measures in the 70's TTT. The Farlap Chex bull in this calf's pedigree was black and white.

You have some greats of Butler genetics on TUMBLER C3 from her sire and dam; and TUMBLER has a heifer calf at side DOB 03/19/23 by HIGH FREQUENCY FC and is exposed back to HIGH FREQUENCY FC and you are looking at a 3:1. Breeding Information: Steer calf at side born 4/20/23 by WA Iodine's Condor MC. Exposed to WA Iodine's Condor MC from 4/20/23 to 8/31/23.

COMMENTS: We bought Dyna at the 2018 sale as an unexposed heifer. We couldn't be happier with the cow she has matured into. Dyna excels in all things, she raises the fattest calf whilst maintaining her condition beautifully. She has an exceptional udder and is easily one of our heaviest milkers. Her calving interval is always inside 12 months & her quiet, workable disposition makes her a pleasure to have around. Dyna has great conformation, she is smooth & deep bodied & developing tight lateral twist. Her third generation has a double shot of Coach & we believe she is a good representation of his type & quality. We are retaining a knockout 2022 heifer. At side she has a fancy red roan steer born 4/20/23, sired by Iodine's Condor MC. She will be exposed back to Iodine's Condor from calving until 8/30/23.

Breeding Information: Bull calf at side born 3/17/23 by SH Buffalo Kelly 8/9. Exposed to SH Buffalo Kelly from 3/17/23 to 8/15/23.

COMMENTS: Beautiful twisty horned young dun cow by SH Rocky Blue (Dalgood's Rocket Man x MF No Bevo Wing) x Carolina Class SH, a Dalgood's Rocky daughter with Primero Class on bottom. She has been a favorite of mine but needs to be with a straight Butler bull. I lost mine and don't have one any more. She has a bull calf DOB 3/17/23 but he is not straight Butler. His sire is though, a beautiful bull that they call Parker Brown now. He has black, a touch of red and white, tiny ears, good horn and good blend pedigree. This cow has always been friendly and never caused any problems. I think she is a very pretty cow.

# ***Pure Butler Texas Longhorn***

A pure Butler Texas Longhorn is a longhorn whose genetics trace back to only cattle originating in the herd of Mr. Milby Butler. This is a very simple statement to make but determining which cattle do indeed trace fully to the Butler herd has been far more complicated.

There are seven accepted subfamilies within the Butler bloodline. They are the herds of the Partlow family, F.M. Blackie Graves, the Meshell family, Ruel Sanders, Luman Holman, Forrest Lepper, and Virgil Shinn. Over the years all of these herds, except those of Lepper and Shinn, contained longhorns of non-Butler breeding in addition to their straight Butler animals. There are also Butler cattle which do not fall into these subfamilies. These would be found in herds such as J.W. Isaacs, the Wright family, and Pauline Russell. There also existed a group of animals which lived within these subfamilies and throughout the breed that were claimed to be straight Butler but which, as a result of paperwork mistakes, carried pedigrees that did not reflect their true genetic heritage. To determine which cattle did or did not trace fully to the original Butler herd, extensive and exhaustive research was done. Countless numbers of conversations and interviews with scores of people were conducted. Thousands of photos were viewed or taken. Pedigrees, personal notes, and records were examined. We saw everyone and everything that had a connection to Butler cattle. We heard facts, legends, lore,

lies, theories, rumors, secrets, innuendo, and accusations. We have the testimony of the men that registered these cattle. It was concluded that there were in fact quite a few that were unquestionably straight Butler, many of which were some of Milby's very best. If they were truly 100% Butler, shouldn't they too be included in the bloodline? We said yes. In the end, one factor alone guaranteed acceptance as straight Butler: the brands. Unlike paperwork, which becomes separated from the animal, brands stay with the animal for life. And as any good cowman knows, brands tell a cow's life story. If the brands identified it as Butler, then it was Butler. A Butler brand verified its true ancestry and simply reflected mistakes made at the time of registration, usually when the cattle were already mature. Anyone understanding the pitfalls and limitations of beginning a registry for a breed as diverse and old as the Texas longhorn can see how a breed that historically had survived for so long on their own, would have a family tree that would be hard to recreate and document. Many cattle regrettably were rejected because they did not have the proper brands to serve as irrefutable proof. What remains is a group of cattle which we can stand behind and know in our hearts are among the purest Butler Longhorns available.

Some would ask who are we to make such decisions and what gives us the right to do so. No one gave us the right; we stepped up and seized it. We are the Butler Breeders. We have always been

Butler breeders. We bred and promoted straight Butler cattle while Texas Longhorn industry psychics and consultants predicted that pure Butler cattle were a fad that would not last; that was in the 1980's. We're still raising pure Butler cattle. We did the research and we did our homework. Your sale hosts alone have over 75 years of commitment to this bloodline. Along with the help of other Butler breeders respected for their dedication to and knowledge of this bloodline, the Butler Breeder's Invitational screening committee pledges to offer only the best representatives possible. This includes the rejection of animals that do not conform to the genetic and phenotypic criteria required. Simply having papers that reflect a straight Butler pedigree does not guarantee acceptance to this sale. Unfortunately, breeders that disagree with our standards may suggest impure motivation on our part. But for us, this is about the cattle, not about people. Our goal is to raise the finest, 100% genetically pure Butler Texas Longhorns possible so as to preserve this magnificent bloodline for the future. Butler cattle have been our love and our lives. We hope Mr. Butler would be proud.
